A WORD OF WELCOME

Dear Customers,

The CDL team is very proud to present its 2020 catalog, featuring several new products for small and large maple syrup producers alike.

CDL's technology and product range now allow all of our customers to maximize flow, work on and improve sap quality and maximize their vacuum systems. The integration of 4.0 systems, ultrafiltration, monitoring and high-Brix systems brings a new dimension to our industry and helps maple syrup producers get the most out of their operations.

For smaller producers, CDL has focused its efforts over the past year on expanding its product range to better meet specific needs. You'll be sure to enjoy our new range of Venturi evaporators, our new small-capacity reverse osmosis systems, our vacuum filter presses and our extended range of 3/16 fittings and tubing.

Over the past few years, our new products have been designed with sustainable development in mind. We're well aware of environmental issues and we want to improve recycling and pollution practices for the products used in our sector. In fact, we want CDL to be an industry model for these issues, which are so important to our future.

All the innovative technologies we present to you every year are developed and manufactured entirely by our Canadian and American teams. Our business model is unique; it allows us to serve you better and has enabled us to remain the world leader in maple syrup production for several years. Our employees' expertise and our extensive knowledge of maple sugaring let us stand out in this ever-growing industry.

Our corporate culture is based on family values such as respect, fairness, simplicity, pride and integrity. Even as the maple sugaring industry adopts more and more new technology, these values remain at the heart of our work and our relationships with our customers, both current and future.

In closing, the CDL team wishes you a very good 2020 season. It will be our pleasure to welcome you and serve you soon in one of our 40 regional branches located in Canada and the United States.

Thank you for placing your trust in us.

On behalf of everyone at CDL,

Martin Chabot, co-owner

Signature SPOUTS

CDL Signature Spouts are the perfect choice for your sugarbush. Here's why:

MINIMUM RESTRICTION

The 45° angle facilitates sap flow and prevents residue or unwanted bacteria from accumulating.

PERFECT SEAL

The thin wall works with the perfect taper to create a completely airtight seal.

LONGER SPOUT WORKS BETTER ON THICK BARK.

CLEAR TO BETTER SEE THE LEAKS

Keep track of your tapping crew's performance by using different colour spouts for each employee.

DID YOU KNOW?

It's been proven that a smaller tap hole doesn't affect the volume of sap collected under vacuum. Keep your maple trees healthy over the years.

Spouts available in 5/16" and 1/4" sizes and many colors for better tapping control in the woods.

MAXFLOW FITTINGS

The new line of **5/16" Maxflow fittings** was specifically designed and developed for maple producers wanting to operate over 25 in-hg (high vacuum). These fittings enable a perfect seal with a vacuum level **beyond 25 in-hg** and offers the following advantages:

- **No parting lines on the first barb.**
- Precision moulding.
- Eliminates micro-leaks caused by molding lines.
- Better grip on the tubing.

**DID YOU
KNOW ?**

ACCORDING TO A STUDY FROM THE CENTER

When comparing sap yield, the white Maxflow spout gave a **sap volume 7% higher** than the black Maxflow spout.

CONCLUSION OF THE STUDY

In the studied sugarbush, white spouts gave a higher volume of sap compared to the black spouts.

This increase, recorded in the last part of the season, would be related to the color of the spout and its thermal absorption properties.

**White spouts,
7% better performance**
